

OBJECTIVES

HARMONY RECYCLERS

HUB

BACKGROUND

- Duaklin Ventures and Clean Consult Integrated Services have been major player in environmental services provision and wastes management.
- Linear environmental management technique is not sustainable, hence the need for knowledge of circular economy.
- Harmony Recyclers Hub is a brainchild of the companies above and created to aggregate volunteers and stakeholders to address waste challenges and promote sustainable practices.
- It is our aim to create a supportive network that foster collaboration, information exchange and collective actions

ROLES HARMONY RECYCLERS HUB

- The hub will collaborate with the community to advance sustainable waste management practices.
- We will promote and advocate for responsible recycling practice and support the interests of recycling businesses.

ROLES OF HARMONY RECYCLERS HUB

- The Hub will embark on advocacy across different segments of communities.
- We will collaborate with government and private institutions in spreading knowledge and awareness on entrepreneurship prospect in wastes management.
- We will network with likeminds both home and abroad to ensure the project achieve the stated aims.
- We hope to embark on researches and also collaborate in profering solutions to environmental health challenges.
- We will engage and work with communities on environmental sustainability and knowledge transfer.

GOVERNMENT AND NON- GOVERNMENTAL ROLES

- **Public-Private Partnerships:** We will partner with government in implementation of policies on wastes segregation from source and wastes recycling, training, EPR etc.
- **Innovation Grants:** supports and grant for environmental sustainability and recycling will be welcomed from corporate bodies and government.
- **Advocacy:** We will work with government especially in advocacy against hazardous practices and improper wastes mangement

TRAINING AND SKILL DEVELOPMENT

- **Organize training and workshops:**We will stage periodic training on new innovative sustainability practices
- **Knowledge transfer Programs:**This will be done through industrial attachment, mentorship and excursion program.
- **Waste Reduction Programs:**The wastes resource recovery initiative not only focused on recycling but the 4Rs of wastes management hierachy.

Waste Management Hierarchy

Most Favoured

Prevention

Minimization

Reuse

Recycling

Energy Recovery

Disposal

Least Preferred
